所有答案請以科學符號表示,例如:

計算出來的答案為 $\frac{1}{3}$,則填寫 3.33×10^{-1} (科學符號的小數第三位,四捨五人進第二位),

計算出來的答案為 $-\frac{2}{3}$ 則填寫 -6.67×10^{-1} (科學符號的小數第三位,四捨五入進第二位)

計算出來的答案為7,則7.00×100

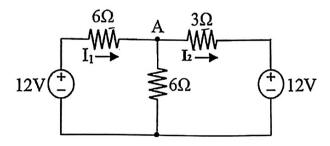

計算出來的答案為-7,則-7.00×10°

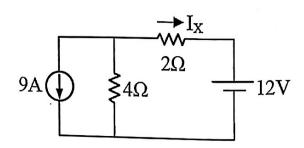

計算出來的答案為 70,則7.00 × 101

如還不知道怎麼填寫答案,請詢問監考人員

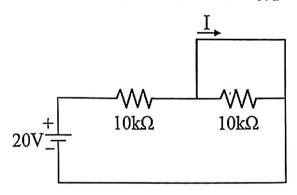

答案以原子筆填寫,每個答案五分

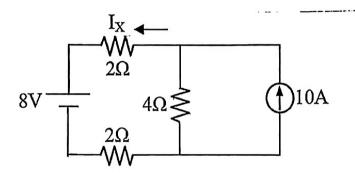

1.下圖電路中電流 I_1 = \square . \square \square \times 10^{\square} 安培與電流 I_2 = \square . \square \square \times 10^{\square} 安培

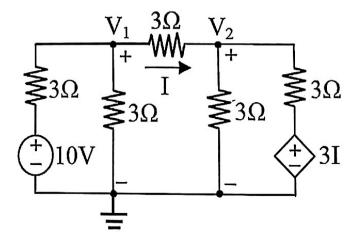

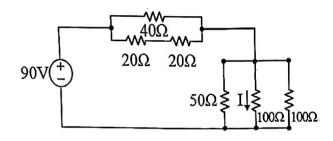

3.如下圖所示,試求電流 $I=\square$. \square \square \square \square \square \square \square 安培

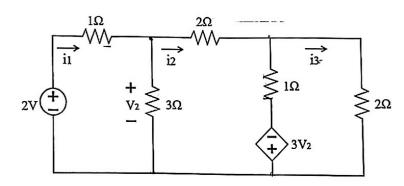

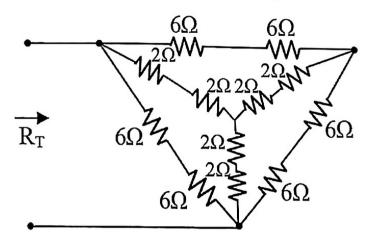

6.如下圖所示,試求電流 $I=\square$. \square \times 10° 安培

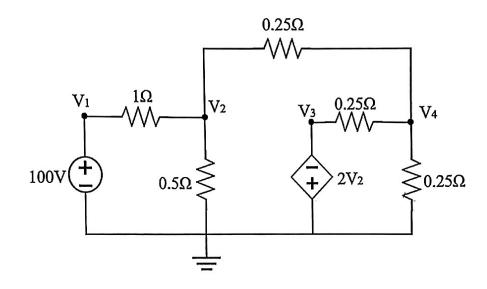

7.如下圖所示,試求電流 i_s =[二]。[二] \times 10^{11} 安培, i_s =[二]。[4][1] \times 10^{12} 安培, i_s =[二]。[4][4] \times 10^{12} 安培

8.如下圖示電路,等效電阻 R_T = \square . \square \square \times 10^{10} Ω

10.如下圖所示,試求電流 $_{\rm I=}$ []. $_{\rm II}$ [] \times $_{\rm II}$ \times $_{\rm III}$ \times $_{\rm IIII}$ \times $_{\rm IIII}$ \times $_{\rm III}$ \times $_{\rm III}$ \times $_{\rm IIII}$ \times $_{\rm III}$ \times $_{\rm IIII}$ \times $_{\rm II$
